

# GO GREEN \$AVE GREEN

Any New Jersey resident can elect to have their utility company choose alternate energy as their electrical energy source. The Fair Lawn Green Team Advisory Committee recommends you consider opting into alternate energy (wind, hydro, solar) selection for your home's electricity.

## Reasons to Opt into Green Energy

- Reduce fossil fuel based energy generation
- Clean the air
- Promote green business
- Drive down alternate energy prices with volume over time
- Drive local, economical, sustainable sourcing of energy supply

All you have to do is visit one of these providers' websites listed below and sign up. There are no fees if you wish to choose another carrier at a later date. Your bill and all electrical and maintenance service continues to be delivered by PSE&G. Each of these suppliers has met the eligibility requirements established by the New Jersey Board of Public Utilities.
